

Live Colorado Springs Training Course!

How to use a Digital Multi-Meter

for troubleshooting electric circuits

Hands - On Intensive!

Eric Shidell, Instructor

For an HVAC Service technician, the electric multi-meter is the most useful and valuable item in the tool kit. This full day hands on training seminar will teach students the ins and outs of how to apply the digital multi-meter (DMM) in the field and how to test electric circuits and components effectively. This course will feature significant hands on experience (training boards) with live electrical testing!

Where: Sand Creek Library
Colorado Springs, CO 80916

When: February 26, 2018 9:30AM til 4:30 PM

Instructor: Eric Shidell, HVAC Service Mentor

Cost: \$257 per person. Includes light breakfast, lunch and course materials.

Students are required to bring the following to class:

- Safety Glasses
- A Digital Multimeter
- Multi – Function screwdriver + 3/8” combination wrench
- Work gloves
