# Electric motor training and troubleshooting!

A thorough understanding of the operation of electric motors is vital to the diagnostic technician. This HVAC Service Mentor seminar will teach students to understand, diagnose, and troubleshoot “The Six” major types of electric motors in the HVACR trade in both residential and commercial applications.

This session is live and in person with instructor Eric Shidell. Students will get the full classroom experience including hands on examples and demonstrations.

**Where:** Koelbel Library Meeting Room A  
5955 S. Holly Street  
Centennial, CO 80121

**When:** Thursday, March 1, 2018 5:30PM to 8:30PM

**Instructor:** Eric Shidell, HVAC Service Mentor

Cost: \$87 per person. Go to the website below for more information and to register!

### Look What's Covered!

- AC induction motor theory
- “The Six” types of motors, their characteristics and applications
- How to “ohm out” a motor and how to interpret the readings.
- Common motor failures and how to recognize them
- Run and Start capacitors.
- Motor starting components.

Each attendee gets a printed handout to keep, and a certificate of participation!
